DETAILED ACTION

Request for Continued Examination

1. The request filed on 06/18/2007 for a Continued Examination (RCE) is accepted and a continued prosecution application has been established. An action on the RCE follows.

Claim Objections

2. Claim 6 is objected to because of the following informalities: The term "substantial" appears to be a typographical error of the term --substantially--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 recites the limitation "the cable securing assembly" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3682

4. Claims 16, 22, 23 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Girvin US 6,382,370.

Girvin discloses:

- a body (15, 92) attachable to a handlebar of the handlebar-steered vehicle;
- an actuator assembly (86, 88) including a lever arm (88, or 15) in pivoting engagement with the body about a pivot axis,
- the lever arm associated with a suspension adjust cable (see figures 1 and 7);
- an actuator control assembly (88, 92, 15) configured to facilitate the repeated switching of the actuator assembly between a first position corresponding to a first suspension setting and a second position corresponding to a second suspension setting (C9/L1-21),
- wherein the second suspension setting is adjustable within a range of alternative second suspension settings without affecting the first suspension setting (C9/L1-21).
- wherein the actuator control assembly further includes an adjustment assembly (88, 92) configured to position the lever arm relative to the body in the second position
- wherein the adjustment assembly comprises an adjustment guide surface (see guide surface surrounding and guiding pin 91) and a translationally

Art Unit: 3682

adjustable mating pin (91) configured to engage the adjustment guide surface.

- wherein the pivot axis of the lever arm is substantially parallel to and spaced apart from an axis of the handlebar (see figure 1).

Allowable Subject Matter

5. Claims 1-12, 15, and 21 are allowed over the prior art.

6. Claims 13 and 14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. Claims 17-20, 24 and 25 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection.
